

Allan Paterson

Head of Programme Management

Dr Allan Paterson is the Faraday Institution's Head of Programme Management. Prior to joining, Allan was Chief Electrochemist as both Cummins and Johnson Matthey Battery Systems, where he led a team of electrochemists, managed a range of collaborative R&D projects including investigating new battery technologies and their application in next generation low carbon EV, PHEV and HEV applications.

Allan has over 19 years' experience in the field of lithium batteries, and over eight years in automotive batteries, including developing novel high energy densities materials and next-generation battery technologies. Allan holds a PhD in Chemistry from the University of St Andrews on advanced cathode materials for lithium ion batteries.
